

The solution for collaborative video projects that anyone can use

eBUS SHARE

Visual Project Sharing Made Simple

eBUS SHARE is ideal for:

- Sending/receiving client video clips & stills
- Organizing VFX production
- Branch offices sharing common assets
- Repurposing content
- Centralizing content
- Corporate internal/external asset sharing

Organize

Project contents, visual assets and related files are collected into graphically identified folders, with content shown by a thumbnail wherever possible, and video clips can be browsed right in place without needing to download

Workflow

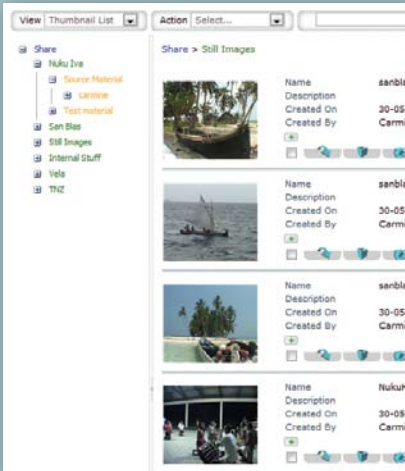

eBUS Share lets you control who can add content to your project. For example, an "invitation to upload" controls exactly where external users can put new content, and even QC's the assets as they are uploaded to ensure you're getting the right type of content.

eBUS SHARE:

- Replaces email, FTP sites and cumbersome expensive off-the-shelf systems with a secure hosted solution
- Uses a simple graphical interface that anyone can learn and use within seconds
- Works anywhere with web access and doesn't need an IT department or special software that's hard to install or use
- Is cross-platform and uses only a standard web browser: collaborators can be virtually anywhere
- Can be combined with other eBUS tools e.g. Clipnotes & Clipdraw for both live and offline collaboration

eBUS SHARE

Visual Project Sharing Made Simple

eBUS SHARE features all these asset management tools:

- Clear graphic/icon-based user interface
- Thumbnail identification of assets with in-place browsing
- Several views available: thumbnail, text-bases and traditional directory "tree"
- User-defined data fields and metadata
- Tools tab allows quick access to other eBUS utilities
- Advanced transcoding, reformatting and repurposing
- "Invite to Upload" and QC of assets from other sources
- Email alert of changes and additions
- Permissions control for viewing, downloads, editing, ...
- Specialized containers
- Advanced search capabilities
- Clip Bin to store search results

Repurposing

A powerful transcoding engine is available to reformat and repurpose eBUS Share assets for a virtually unlimited numbers of uses

Security

A simple user interface allows access to only the assets you choose to make available. Users see only their allowed workspace and can perform only the actions that you decide

Notification

Users can be notified of all important actions, defined by you on a case-by-case basis.
